DIRECTORS' REPORT

TO THE SHAREHOLDERS:

Your directors submit herewith the Annual Report of your Company for the fiscal year ended December 31, 1967.

Accompanying this report is a Notice of the Annual Meeting, which is to be held in Montreal on June 28, 1968. If you are unable to attend, please complete the enclosed form of proxy and return it to the Secretary, in the envelope enclosed for convenience.

The principal asset of your company is the eighteen claim group in the Rouyn-Noranda district of northwestern Quebec. In view of the more favourable outlook for gold and new ore developments in the immediate area, your directors are currently giving serious consideration to a renewal of work on this property. To this end all pertinent information is now being assembled and studied in detail. Prior to the suspension of milling in July, 1955, this property property produced \$4,050,120 in gold from 692,094 tons of ore. The shaft was subsequently deepened from 717 feet to a depth of 1,820 feet, with drilling indicating an estimated 520,000 tons of ore grading 0.26 ozs. gold per ton.

During the year under review a preliminary geophysical program was carried out on claims held in Ottaway Township in the Timmins area of Ontario. This work did not, however, turn up any conclusive targets for advanced exploration.

Of immediate interest is the recent acquisition by way of staking of a group of 22 claims in the Coppermine River area of the Northwest Territories, long known for its copper potential. Only since 1967, however, has it emerged as an important sector on the exploration scene. This resulted from the significant discoveries made by PCE Explorations which attracted the financial partnership of a group of senior companies including Conwest Exploration Company Ltd., Newconex Canadian Explorations Ltd., and Pan American Canada Oil (wholly owned subsidiary of Standard Oil of Indiana). This group of companies has budgeted the expenditure of several million dollars for a major diamond drilling program already under way. Combined with the efforts of other operators in the area it would appear that activity in Coppermine this summer will be the greatest of any mining camp in Canada.

Your company's claims are considered to be strategically located in relation to a number of nearby drilling projects. On this apparent merit, your directors were able to conclude an arrangement with a group of mining companies headed up by Frobex Limited of Toronto whereby that group will provide exploration funds on a scale which can ultimately earn them a 51% interest in the ground.

Your company thus gains the benefits of experienced technical and financial associates in the project without itself facing serious commitments during the initial exploration stages. At the same time a worthwhile equity will be retained in an interesting mining prospect.
